

RUN YOUR RESTAURANT OR TAKEAWAY FROM ANYWHERE

One connected system for orders, customers, staff and growth.

Your System. Your Way.

Whether you run a restaurant, takeaway or both, every feature can be enabled or disabled to match your operation. Use what you need today and activate more whenever you are ready.

NO CONTRACT

Stay flexible without a long-term commitment.

NO COMMISSION

No per-order fees taking a share of your sales.

LESS HARDWARE

Operate from phones, tablets or computers.

Everything you need, without the expensive setup

CROWN EPOS brings ordering, reservations, customers, stock, promotions and staff controls into one cloud-based platform. Connect kitchen and bar printers to your router, then let authorised team members take orders from their own devices and send them straight to the kitchen.

- ✓ Manage your restaurant or takeaway from a mobile phone, tablet or computer.
- ✓ Allow trusted staff or family members to help securely from another location.
- ✓ Recall a returning customer's previous order and send it to print in a few clicks.

READY TO SIMPLIFY YOUR BUSINESS?

Work smarter. Serve faster.

SCAN TO VISIT

Everything You Need, Working Together

Choose the features that fit your restaurant, takeaway or both.

ORDERS AND SERVICE

- **POS Terminal**
Process dine-in, walk-in/waiting, collection and delivery orders with caller ID and postcode address lookup.
- **Online Ordering**
Receive online orders directly through your connected system.
- **Self-Ordering**
Let dine-in and waiting customers place their own orders.
- **Repeat Orders**
Load a customer, recall their previous order and send it to print in a few clicks.
- **Delivery Clustering**
Automatically group nearby orders under a unique delivery ID for easier driver planning.
- **Order Tracking**
Follow each order from acceptance through preparation and fulfilment.
- **Item Label Printing**
Print a clear label for each item and reduce handwritten notes.

MANAGEMENT AND CONTROL

- **Menu Management**
Add or update menu items yourself from anywhere in the world.
- **Stock Management**
Monitor and manage your food business stock in the same system.
- **Smart Shopping Lists**
Build reusable lists by supplier and share them by WhatsApp, email, text or another method.
- **User Management**
Set staff permissions, restrictions and schedules so you control access and usage times.

CUSTOMERS AND BOOKINGS

- **Reservation Management**
Accept online bookings in a digital diary and open or close individual time slots.
- **Reservation Card Printing**
Print professional booking cards to place on tables before guests arrive.
- **Digital Gift Cards**
Sell digital gift cards online or directly through the POS terminal.
- **Customer Data**
Access and manage your customer database for service, loyalty and marketing.
- **Customer Notes**
Keep an internal log of complaints, service issues and important customer information.

MARKETING AND GROWTH

- **Promotions**
Create unlimited promotional codes and choose the conditions for each offer.
- **Review Requests**
Send customers a social media review request with a single click.
- **Voucher Printing**
Print mini vouchers for offers or events to place in takeaway bags or on tables.
- **Partner and Venue QR**
Run automated partner offers and track which venues or advertisements generate results.

Operate Anywhere

Run the system from a phone, tablet or computer, with authorised access for the people you trust.

● ANY DEVICE

Use mobiles, tablets or computers.

● REMOTE SUPPORT

Let authorised people assist from elsewhere.

● DIRECT TO KITCHEN

Send orders straight to connected printers.

FULLY CONFIGURABLE

Enable what you need. Disable what you do not.

No contract | No per-order commission | Access from anywhere
